Canon

CLOUD CONNECTOR
A Convenient Connection in the Cloud

Pair Supported Canon MFPs to Select Cloud Services for Virtually Seamless Print and Scan Capabilities

Connecting to cloud services in the workplace is often a major contributor to overall efficiency. Cloud Connector from Canon is an easy-to-use application that connects imageRUNNER ADVANCE DX, imagePRESS Lite, and supported imagePRESS models[1] with select cloud services[2], allowing users to expand their print and scan capabilities without the need for additional backend system configuration. This convenient solution includes simple setup and activation steps, and an uncomplicated, do-it-yourself user registration process.

There are Cloud Connector options that enable users to easily:

Connect to select cloud services

Connect to user's own email

Scan and upload directly to cloud storage
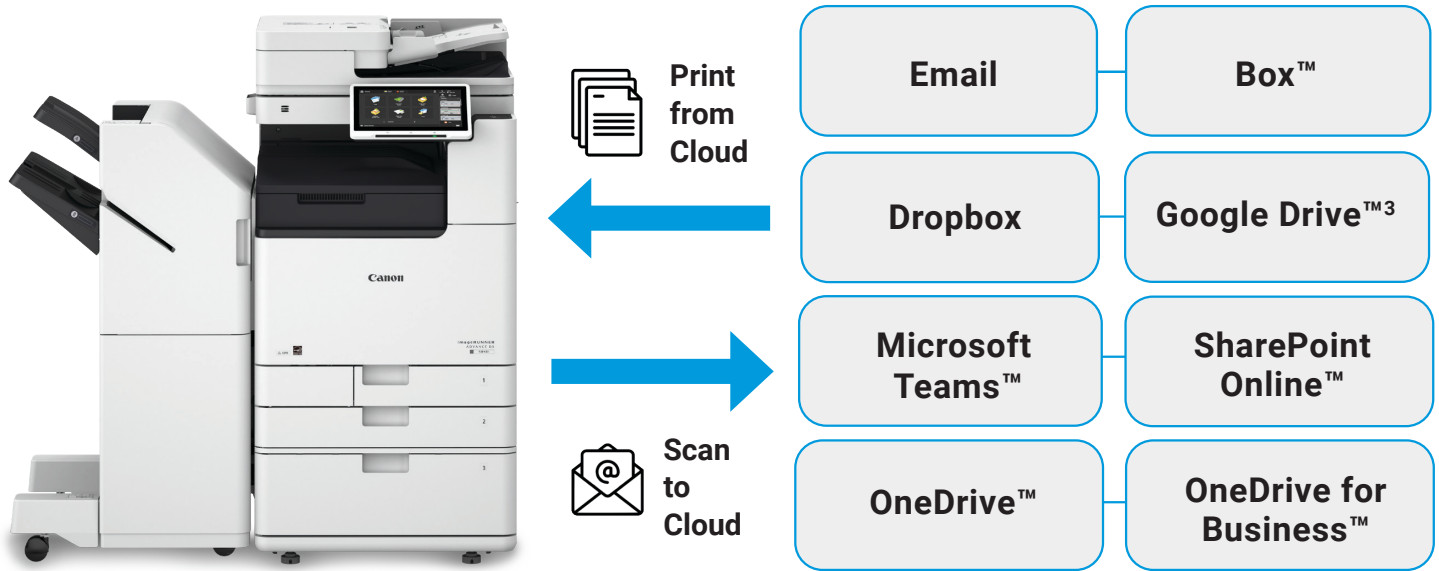

Print from the cloud at the device

Scan to email without admin set up

Print from email without use of print drivers

Connect Your Canon MFP to These Cloud Services with Cloud Connector

####

How to print and scan:

mobileprint@cloudconnector.online

Send Office or PDF files to this email address to release them on the device.
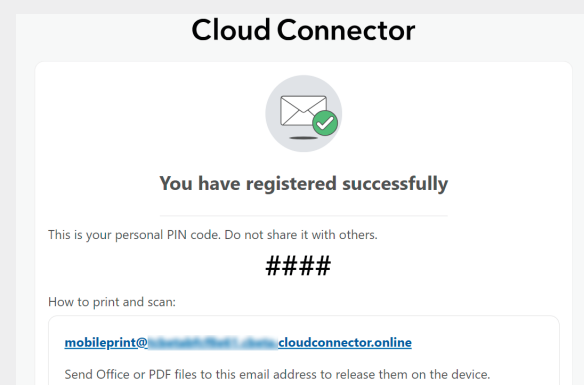

**An Automatically
Generated Pin Will Be Sent**

**Cloud Connector for Email
setup is now complete.**

Users who are connecting
to cloud storage will need to
complete an additional step.

Cloud Connector

Dear user,

To connect to this destination, you have to link your OneDrive account. Click the "Authenticate" button below within the next hour to authorize the Cloud Connector app to access your OneDrive account.

Once you've linked this account, you can browse the folders and select the files you want to print the next time you use the Cloud Connector app.

Authenticate

You only need to do this once for each destination, even if you want to use other Cloud Connector apps on this device.

Need further instructions? Open help

Please do not reply to this message.

Authenticate to Cloud Service

Note: If you do not log in to Cloud Connector within 30 days, you will need to re-register with the device.
