

SAFETY AND SOCIAL DISTANCING APPLICATIONS ON RIGID MEDIA

As businesses begin to re-open their doors to their employees and customers, it is critical that they are able to implement tools that contribute to providing a safe environment. In this re-opening phase, you can help your customers transition back to work with minimal headaches. Social distancing and directional signage will be crucial to communicating the necessary messaging in these new circumstances to help improve safety and cleanliness, minimizing the risk to employees and customers.

Take advantage of the Arizona and Procut devices' flatbed tables, to produce applications on a wide variety of durable rigid media. From DIBOND, and fluted polypropylene for indoor and outdoor signage, to utilizing cutting solutions to construct display stands on corrugated cardboard and protective shields using Plexiglass and acrylic.
