CANON CANADA, BCDVIDEO PARTNER TO PROVIDE INDUSTRY LEADING VIDEO STORAGE SOLUTIONS TO THE CANADIAN MARKET

MISSISSAUGA, ON., February 25, 2016 – Canon Canada is excited to announce a new, exclusive partnership with BCDVideo that will bring more security storage and network solutions for Canon's Canadian customers.

As part of the new partnership, BCDVideo will manufacture exclusive video solutions for Canon to complement its network camera products, creating a fully integrated, install-ready security solution. Among these solutions include: the IMAGEserver CANOU6R, IMAGEserver CANOU6RH, IMAGEserver CAN1U10R and the IMAGEserver CAN1U16R.

The IMAGEserver video storage solutions offer the latest generation of Intel processors, redundant power supplies, special surveillance hard drives with superior random write capabilities, RAID 5 protected storage and a three-year on-site server warranty with advance drive replacement.

In addition to a superior product, BCDVideo solutions come with a performance guarantee of delivery, installation and operation in less than 14 days.

"Today's customers are not only looking for great quality, technically-savvy products, but also the solutions that enhance and support these products," said Steve Mackay, Director of Strategic Markets Division of Canon Canada. "Expanding our product offering to include BCDVideo storage servers allows us to provide a wider range of solutions to our customers with the quality and reliability customers have come to expect from Canon."

"We're excited to be working with Canon Canada in bringing this innovation to the Canadian marketplace," said Jeff Burgess, President of BCDVideo. "This new partnership provides a path to a new customer base, which has an appreciation – *and expectation* – of high quality and exceptional performance in imaging technology. That was the premise to which we built our servers for Canon Canada."

The IMAGEseries servers consist of tower and rack-mount units which range in total storage based on number of cameras installed and are available in configurations that handle both analog and digital network cameras providing compatibility for customers looking to upgrade existing systems or implementing new ones. These video servers come with BCDVideo's easy to use Mission Center System Monitoring software for intelligent performance management and can be configured with the latest video management software solution from a variety of companies.

About BCDVideo

An industry leader in the manufacturing of high-performance IP video storage solutions, BCDVideo was founded in 1999 with the belief that quality service, peace of mind, and trust are instrumental to success in the security market. No other manufacturer will work harder to ensure your security project runs flawlessly. BCDVideo's performance guarantee ensures storage and network design success, and install-ready systems will be delivered in 14 days or less. Find comfort knowing BCDVideo solutions are engineered for zero down time throughout the life of virtually any security project. BCDVideo is also able to provide total coverage with an industry-leading, worldwide, on-site warranty.

BCDVideo has proudly worked with the world's top security integrators and has achieved a global footprint of successful installations across 6 continents and 40 countries, spanning countless verticals. To learn more about BCDVideo and our unique technologies, please visit www.bcdvideo.com
